Summary

Data Scientist mit Master in Angewandter Mathematik und Erfahrung in Datenanalyse, Datenqualität und Machine Learning. Praxis in Python, SQL, ETL- und ML-Pipelines, Datenmodellierung und statistischer Modellierung. Erfahrung in der Übersetzung fachlicher Anforderungen in datenbasierte Lösungen sowie in der Zusammenarbeit mit Fachbereichen und IT-Stakeholdern.

Projects

Retail Demand Analysis & Forecasting Platform **Dec 2026 - Jan 2026**

Github Link

- Entwickelte eine End-to-End-Time-Series-Forecasting-Plattform für Corporación Favorita (125 MIO.+ Transaktionen, 4.100 Produkte, 54 Filialen) mit 20+ Modellen (ARIMA/SARIMA, Prophet, XGBoost, LSTM).
- Erreichte MAE 1.35, RMSE 1.98, MAPE 42.3% (LSTM) und 94.8% Umsatzprognose Genauigkeit 12–15% Lagerbestandsreduktion möglich.
- Baute eine Streamlit App mit Echtzeit Forecasting & KPI Dashboards; integrierte MLflow, Docker & Dask für skalierbare Batch Pipelines und Modellversionierung.

Customer Segmentation & Personalization E. **Oct 2026 - Nov 2025**

Github Link

- Built a customer segmentation engine using rule based logic and K Means/DBSCAN over 49k+ sessions, validating segment quality with ARI/NMI and statistical tests (χ^2, t tests). Reduced perk misallocation and identified segments with up to 30% stronger behavioral cohesion.
- Developed a modular pipeline with automated feature engineering and an A/B testing framework, enabling experimentation across 100k+ users and improving conversion insights by 22%.

CIFAR-10 Image Classification **Aug 2026 - Sep 2026**

GitHub Link

- Built an end-to-end image classification pipeline with two-stage transfer learning, config-driven YAML, and CLI tooling—61.35% val accuracy, AUC 0.8967, Top-5 93.23% (6× above baseline).
- Production-ready: 26/26 tests passing, 13/13 artifacts validated, MLflow tracking, full reproducibility (seed 42)

Technical Skills

Data Science

Data Cleaning, Exploratory Data Analysis (EDA), Statistical Analysis, Funnel Analysis, Feature engineering, model evaluation (CV, metrics), A/B testing basics, ETL/data pipelines, versioning (Git).

Python

Pandas, NumPy

Machine Learning

Regression, KNN, SVM, Random Forest, XGBoost, Decision Trees

Data Visualization

Tableau, Seaborn, Matplotlib

Database

SQL, PostgreSQL, MySQL, Excel (PivotTables, PowerQuery if applicable)

Deep Learning

RNN, LSTM, CNN, TensorFlow / Keras, PyTorch, FNN

Statistical Modeling

Hypothesis testing (χ^2 ; t tests), uncertainty analysis, statistical validation, confidence intervals, residual diagnostics, leakage detection, cohort quality assessment

Soft Skills

Problem-solving

Teamwork

Communication

Critical Thinking

Attention to detail

Languages

French

Native

German (C1)

Professional working proficiency

English

B2

Experience

Loretta — **May 2026 - Present**
Data Scientist (Internship) — Berlin
Loretta

- Data & ML Engineering: Assessed data quality and leakage risks; developed federated learning for 8 clinical indications (AUC 0.89–0.51) with model validation, Docker, and reproducible ML pipelines.
- Privacy & DevOps: Implemented DP, SecAgg+, k-anonymity, and fail-closed budget accounting; 808 tests, 0 CI errors with GitLab CI/CD.
- Stakeholders: Coordinated with domain and IT teams; translated findings into technical concepts and decision documents.

Deutsch Post DHL Group — **Sep 2020 - Dec 2024**
Courier Driver — Hamburg, Germany

- Managed daily delivery routes with high volume (120+ parcels/day), prioritizing accuracy, safety, and time-critical execution.
- Operational logistics activities within the delivery unit.
- Insight into logistical processes and supply chain workflows.

Institute of Applied Mathematics, Saarland University — **Oct 2009 - Mar 2011**
Research Assistant — Saarbrücken, Germany

- Tutored 20-student groups in statistics and numerical analysis; refined course content via performance reviews, improving clarity and outcomes.

Education

Masterschool — **May 2025 - Present**
AI and Data Science — Training Program

- Built analytics workflows in Python (Pandas, NumPy) and SQL to clean/join datasets and deliver insights.
- Created dashboards in Tableau to communicate KPIs and trends to non-technical audiences.
- Applied regression and clustering models; evaluated performance using appropriate metrics.

Saarland University — **Oct 2009 - Apr 2013**
Applied Mathematics — Master Degree

- Advanced expertise in mathematical modeling, numerical analysis, and optimization, with robust skills in statistical methods, computational mathematics, and data-driven problem-solving for quantitative and analytical challenges.

Yaounde I University — **Oct 2000 - Apr 2005**
Applied Mathematics — Bachelor Degree

- Focused on numerical methods and strong foundations in mathematical theory, computational techniques, and analytical problem-solving.

Certifications

Advanced Data Science and AI
MSIT
July 2026
Certificate of completion

Foundations of Data Science
Google(Coursera)
April 2026
Coursera

Natural Language Processing with Classification and Vector Spaces
DeepLearning.AI(Coursera)
March 2026
Coursera

AI For Everyone
